1. Short Title	This Act may be known as the <i>Sarovian Appropriations Act of 330 AS</i> .																								
2. Introduction	With the introduction of the new SaroBot and through prudent and successful financial prowess, His Imperial Majesty's Government has, over a Stefanic decade, entirely reshaped the Sarovian economy, tackled the worst inflation in Sarovian history inherited by the Marchwood administration, and put more money into the pockets of Sarovians. This Budget is aimed to complete the final steps of the Prime Minister's comprehensive financial package - cut out the fat and eliminate the grifters who exploit the old Sarovian economy to enrich themselves, despite doing nothing to benefit the country. It is through this backdrop that significant government spending is necessary to fix the inactivity and sloth of the provincial governments through massive funding initiatives. With the government's large surplus, we can afford to splurge on making Sarovia's economy the strongest online economy found anywhere.
